

Milk Mixing

Turn water on until it reaches a constant temperature of 110 °.

Carefully open 1 bag of milk replacer.

Slowly pour 1/2 bag into the vat.

Turn on mixer and slowly pour the rest of the bag of milk

Once vat is 1/2 full turn on milk pump. Mix and circulate milk.

When vat is full turn off water. Circulate milk for 5 minutes.

After milk is completely mixed, start feeding calves.

Fill milk bucket to recommended level.

After calves are fed, rinse and sanitize vat and hose.
